>> Chris,

>>

>> As you know, we as ginner have lots of variation in our days as far as

>> "everything working or not". Our year has been typical at this point.

>>

>> I am really pleased at this point at the moisture control system at TOT

>> (also almost everything else).

>>

>> Just today I took two of our large farmers and stockholders through the

>> gin and probably the most impressive issue with them was first- the moisture

>> mirror that showed the moisture condition of the cotton from beginning

>> to end, then the physical "feel" of the cotton at the press. "Really good"

>>

>> Next I come back to Edcot and Hugh asks "how high can I go with moisture

>> at the bale?" Of course I say let your conscience be your guide. Never

>> did I suspicion that he was registering on both of our hand moisture meters

>> 9-10%. Obviously the moisture hoppers over the gin stands were really working

>> well as well as the steam roller.

>>

>> I am sending this to say " we are very pleased with the equipment and

>> personnel performance of Samuel Jackson".

>>

>>

>> Thanks and best regards,

>>

>> Larry Nelson
