

# DIRECT-FIRE HEATERS

## *A Heater as Serious as You Are...*

It all comes down to the details. An adjustment here. A tweak there. A continuous push to improve performance, lower operating expenses and squeeze the most bang out of every buck. Even when things are running well, the challenges and the need to improve never stop. It requires a vigilant eye for opportunities, big or small, and the courage to pursue them. Are we talking about our heaters? Or your process?

Both.

Take a look at a heater built with the same passion and drive that you have for your process. We think you will like what you see.

- Fuel Saving Shed Technology
- High Turndown Ratio
- High Air Volume Design
- PLC & Touchscreen Controls
- Automatic Moisture Control Compatible
- Ethernet Capabilities
- Comprehensive Diagnostics
- Integrated Test Program
- Rugged Components

Call us or visit our website for more info on putting our heaters to work for you.
