

Vomax Technology is now American-made and half the price of its predecessor...

Introducing the Tex-Max.

The Tex-Max logo incorporates the sensor's Australian roots and its new West Texas manufacturing home.

A Vomax Bale Moisture Sensor in operation at Holly Ridge Gin in Indianola, MS.

Seven reasons your gin should have a Tex-Max Bale Moisture Sensor this season:

1. Know the moisture of every bale that leaves your gin.
2. Moisture Mirror compatible, allowing for automatic bale moisture control output.
3. Documented bale moisture data when used with a printer option or a Mirror III or IV.
4. Provides an average reading based on thousands of scans per bale.
5. Extensive research and testing reports reliable and repeatable readings.
6. Over 40 units with Vomax Technology sold in the U.S. since 2005.
7. With a price of \$16,995, the Tex-Max is the best value on the market today.
